

New in The RFID Shop

December 2016

The RFID Shop is now a partner of IMPINJ!

We are excited to announce that RFIP Ltd with The RFID Shop have become a channel partner of Impinj!

The Impinj Platform is an integrated set of UHF RFID hardware, software, and application interfaces and is **the most comprehensive and widely adopted platform in the industry.**

The Impinj Platform **provides real-time information about people and objects, including their identity, location, and authenticity**, allowing companies to improve business decisions and enhance consumer experience.

All Impinj products can be purchased via The RFID Shop, but we will be particularly focussing on the Impinj X-Array Gateway and the Speedway RAIN RFID Readers.

New product in the RFID Shop: Denso BHT-1281 RFID Handheld Terminal

The BHT-1281 RFID is a high-powered RFID terminal with an **extremely high scanning speed.**

The circular polarized antenna enables 360° scanning **and reading of multiple tags facing in different directions.**

Boasting **long-range scanning capability**, the BHT-1281 RFID scans tags on goods placed on high level storage, contributing to a significant improvement in operational efficiency.

The **unique power-saving feature** enables best in class battery performance of approximately 60 hours when the wireless function is enabled as needed, and approximately 8 hours even when RFID tags are scanned continuously.

BHT-1281 RFID does not only scan RFID tags, but is also equipped to **read all barcodes.** Furthermore, it **includes a touch panel, wireless LAN and Blue-tooth capability** to ensure effortless and reliable operations.

It has a **3.5-inch HVGA colour liquid crystal screen** providing you with a clear and easily readable display.
