

New in The RFID Shop

January/February 2017

The RFID Shop is looking forward to an exciting 2017!

One of our longest and most trusted partners, HID continues to expand its innovative and comprehensive range of RFID tags.

HID Global offers the most diverse and flexible line of tags and transponders, backed with over two decades of RFID development and manufacturing expertise. Swiss engineering, patented processes, combined with own, fully automated ISO 9001:2008 certified production, ensures affordable top quality.

HID provide tags in all frequencies ensuring maximum flexibility and diversity.

In their HF range HID Global provides the unique trusted tag that has the capability to generate a cryptographic authentication code every time the tag is tapped and appends the code to the URL read from the tag. This makes every tap unique and also prevents the tag from being cloned. HID Trusted Tags are NFC Forum Tag Type 4 compliant and work with any NFC forum compliant device.

We are excited to announce that RFIP Ltd with The RFID Shop have become a channel partner of Impinj!

The Impinj Platform is an integrated set of UHF RFID hardware, software, and application interfaces and is the most comprehensive and widely adopted platform in the industry.

The Impinj Platform provides real-time information about people and objects, including their identity, location, and authenticity, allowing companies to improve business decisions and enhance consumer experience.

All Impinj products can be purchased via The RFID Shop, but we will be particularly focussing on the Impinj X-Array Gateway and the Speedway RAIN RFID Readers.

Watch this space!

TSS have been going from strength to strength and we are looking forward to our continued partnership with this vibrant company. TSS have a particularly close relationship with their customers and aim to always provide cutting edge technology and excellent support.

They recently introduced a handheld reader that is Bluetooth enabled. Based on their successful HUR120, this clever device has everything that made it popular before and more! It is light, ergonomically shaped and offers unsurpassed reliability with extra long battery life.

And with its Bluetooth capability it provides now even more flexibility. Any Bluetooth enabled device such as your Smartphone or tablet will allow you to communicate with this reader.
